

New Year's greeting 2025

"The vision of eCardiacRehab is to make cardiac rehabilitation accessible to everyone."

Dear collaborators and friends of eHjerteRehab,

The past year has been eventful, exciting, and at times challenging. Securing a significant research grant requires extensive effort and organisation.

We are also underway with testing! Here, we have filmed real-time training and CPET.

At the beginning of December, we hosted our annual grand meeting at the Bikuben Conference Centre. The day was packed with fascinating speakers, and you can read more about the event here: [General Meeting 2024](#).

We would like to thank everyone for the excellent collaboration over the past year and wish you all a wonderful and promising New Year.

Happy New Year!
