

## Supplementary data

**Table 2. Implants**

Implant	n (%)	n (%)
Screws/pins	15,761 (100)	
Olmed (DePuy Synthes)		8,297 (53)
Richards CHP (Smith & Nephew)		4,688 (30)
LIH nail (Orthovita)		1,783 (11)
Asnis III (Stryker)		989 (6.3)
Other/missing		4 (0)
Hemiprosthesia (femoral stem)	24,382 (100)	
Exeter/V40, cemented (Stryker)		8,400 (34)
Corail, uncemented (DePuy Synthes)		5,595 (23)
Charnley, cemented (DePuy Synthes)		2,623 (11)
Lubinus SP II, cemented (Link)		1,973 (8.1)
Charnley Modular (DePuy Synthes)		1,675 (6.9)
Spectron EF, cemented (Smith & Nephew)		1,424 (5.8)
Other/missing		2,692 (11)
Total hip prosthesis (femoral stem)	1,546 (100)	
Corail, uncemented (DePuy Synthes)		483 (31)
Exeter/V40, cemented (Stryker)		436 (28)
Charnley, cemented (DePuy Synthes)		142 (9.2)
Charnley Modular (DePuy Synthes)		125 (8.1)
Lubinus SP II, cemented (Link)		90 (5.8)
Spectron EF, cemented (Smith & Nephew)		84 (5.4)
Other/missing		186 (12)
Sliding hip screw	22,200 (100)	
Richards CHS (Smith & Nephew)		15,178 (68)
DHS (DePuy Synthes)		3,874 (17)
LCP DHS (DePuy Synthes)		3,045 (14)
Other/missing		103 (0.5)
Intramedullary nail	7,502 (100)	
Gamma 3 (Stryker)		4,535 (60)
Trigen Intertan (Smith & Nephew)		1,555 (21)
PFNA (DePuy Synthes)		516 (6.9)
T-Gamma (Stryker)		448 (6.0)
Other/missing		44 8(6.0)

**Table 3.** Reoperations the first year in the 5 time periods. The table shows number of reoperations and relative risk (RR) for reoperation (Cox regression analyses with adjustments for age group, sex, and ASA class)

Time period	Number	Reoperations	Unadjusted		p-value	Adjusted <sup>a</sup>		p-value
			RR	95% CI		RR	95% CI	
<b>All fractures</b>								
2005–2006	12,182	910 (7.5)	1		< 0.001	0.84	0.77–0.93	< 0.001
2007–2008	14,818	936 (6.3)	0.85	0.77–0.93		0.71	0.64–0.78	< 0.001
